Hey guys / gals - As my sig says, I have a new(er) Jetta and my mom has a new Tiguan. However, my dad is looking at 2002-2004 1.8T Jettas. I know the coil pack on these are common problems and the turbos are somewhat weak, but how long should we expect a turbo to last? Is buying a 1.8T with 100K miles just asking for trouble in terms of turbo replacement soon?
