The US spec Jeep Liberty CRD used the
R428 engine from VM. Essentially, this
was a bored out version of the R425,
which was a 2.5L and was widely used in
Europe. In the US Liberty configuration,
the R428 made 150 horsepower and 295
lb-ft of torque, and this was largely in
line with European configurations as
well.

As a complete Jeep ignoramus, I would like to know what exactly goes wrong/is wrong with VM Motori engines. These things are fitted to many vehicles, but generally when they are mentioned on any forum, the feedback is fairly negative. I would really appreciate some solid, technical feedback from people in the know. Not anecdotal hearsay please.
