To create a go kart with a lawn mower engine, measure the size of your engine so you know how large your frame will need to be, such as a 5 to 7 horsepower engine for a standard-sized kart. Next, cut the materials to the right size for your kart, making the kart's width about 2/3 of your wheel base, and assemble them.

This kart is a go kart that's good the way it was designed, for a small 4-7 hp industrial engine. If you do end up putting a 125cc dirt bike style engine on it, you do it at your own risk. But if you do, you should at least consider putting a live axle on it and re-gearing it so you will go slower, and not flip it at a higher speed.
