1. Leibniz and Wolff: Perfection and Truth. The traditional idea that art is a special vehicle for the expression of important truths is the basis for the work of the philosopher who established the framework for German thought for much of the 18 th century, namely, Christian Wolff (1679-1754). Wolff never devoted a whole work to aesthetics, but many of the ideas that would influence ...

Invasive species represent a largely unquantified threat to ecosystem services. Although investment in the prevention of species invasions may sustain ecosystem services, these effects of invasions are rarely measured in monetary terms useful to decision makers. We quantify the economic damages of the degradation of an important ecosystem service, water clarity, caused by invasion by the spiny ...

A comprehensive model of the human intellect's evolution is presented, ranging from the origins of higher cognition to 21st century academic culture. It begins by delving into the composition of the pre-human mind, treating complications in deriving an all-encompassing theory of life's comparative phenomenology, and then providing outlines of such a theory to the extent which seems ...
