1. Motivations. There are many reasons for philosophical interest in nonhuman animal (hereafter “animal”) consciousness: First, if philosophy often begins with questions about the place of humans in nature, one way humans have attempted to locate themselves is by comparison and contrast with those things in nature most similar to themselves, i.e., other animals.

Animal Consciousness (Stanford Encyclopedia of Philosophy)

The anatomy of the canine skull and spine is quite similar to the human spine. Like in people, the canine spine supports weight and encloses the spinal cord. The spine is located along the dorsal / top side of the canine's body and runs from the base of the head to the end of the tail.

Anatomy of the Canine Spine - Physiopedia

The structure, anatomy and morphology of mature seeds: an overview More general seed structural features: Seeds are the dispersal and propagation units of the Spermatophyta (seed plants): Gymnosperms (conifers and related clades) and Angiosperms (flowering plants). A comparison of these to major groups is presented on the "Seed evolution" webpage.
