Architectural Working Drawings Residential And

An architectural drawing or architect's drawing is a technical drawing of a building (or building project) that falls within the definition of architecture. Architectural drawings are used by architects and others for a number of purposes: to develop a design idea into a coherent proposal, to communicate ideas and concepts, to convince clients of the merits of a design, to assist a building ...

Architectural drawing - Wikipedia

The drawings in your Residential construction documentation set are either built-to-scale or as per elevational, sectional, or plan views. All designs follow identical architectural standards that allow them to be deciphered and interpreted. Architecture drawing plans serve two critical functions – applying and receiving the building construction permit and helping in construction.
