### ATP III Guidelines At-A-Glance Quick Desk Reference

ATP II set a new, lower LDL cholesterol goal of  $\leq 100$  mg/dL. ATP III adds a call for more intensive LDL-lowering therapy in certain groups of people, in accord with recent clinical trial evidence, but its core is based on ATP I and ATP II. Some of the important features shared with previous reports are shown in Table A in the Appendix.

The mitochondria use glucose and oxygen to produce ATP (adenosine triphosphate), the body's primary source of energy. This is called aerobic energy production. Whenever cellular oxygen levels decrease and/or the mitochondria are not functioning properly, the body must turn to less efficient energy production to metabolize glucose and produce ATP.
