Chapter 19 Bacteria and Viruses Flashcards | Quizlet  
Viruses that infect bacteria are called bacteriophages. They enter living cells and, once inside, use the machinery of the infected cell to produce more viruses. Viral Infections Viruses have two methods of infection once inside a host cell. In a lytic infection, a virus enters a cell, makes copies of itself, and causes the cell to burst,

---

14 Best Images of Viruses And Bacteria Worksheets ...  
Lytic cycle- Some viruses immediately begin using the cell's machinery to replicate more viruses. In this case, the cell is destroyed shortly. Lysogenic cycle- Other viruses insert their genetic information into the cell's chromosomes. At some point, these viruses can also use the cell to produce more viruses, destroying the cell. 19.

Bacteria and Viruses. 7th Grade Science Worksheets and ...

Bacterial and viral infections have many things in common. Both types of infections are caused by microbes -- bacteria and viruses, respectively -- and spread by things such as: Coughing and sneezing.

---

Bacteria and Virus Crossword - WordMint

Bacteria and Viruses. New Hampshire Education Standards.

Bacteria are prokaryotes, meaning that their DNA is in the cytoplasm because they do not have a nucleus. In addition to not having a nucleus, bacteria also do not have many of the other structures that are found in a eukaryotic cell.
