Structure. Daily inflation-indexed bonds pay a periodic coupon that is equal to the product of the principal and the nominal coupon rate.. For some bonds, such as in the case of TIPS, the underlying principal of the bond changes, which results in a higher interest payment when multiplied by the same rate. For example, if the annual coupon of the bond were 5% and the underlying principal of the ...

Default risk. As indicated by their lower credit ratings, high-yield debt entails more risk to the investor compared to investment grade bonds. Investors require a greater yield to compensate them for investing in the riskier securities.. In the case of high-yield bonds, the risk is largely that of default: the possibility that the issuer will be unable to make scheduled interest and principal ...
