## **Chapter 16- Anatomy and Physiology of the ... - My Test Banks**

The cardiac cycle can be divided into two phases: systole, in which blood is pumped from the heart, and diastole, in which the heart fills with blood. Systole and diastole are each subdivided into two further phases, resulting in a total of four phases of heart action. Depending on the phase, pressure and volume in the ventricles and atria change, with the pressure in the left ventricle ...
