However, you might also run into several copies for sale, as reformatting the print copy into an eBook still took some work. Some of your search results may also be related works with the same title.

Petrology | science | Britannica

Volcanologists study how and where volcanoes and related phenomena (lava, magma) erupt and form (past and present). They may work with seismic data and plate tectonics. Their primary focus is reducing or mitigating the negative impacts related to a volcano eruption. As volcano safety risk is already quite low, volcanologist careers are uncommon.
