Mitosis and Meiosis (#1007182) Created by Anonymous Visitor Across Clues 3. the diploid number for human body cells 5. chromatids separate and go to opposite poles in mitosis 7. the union of the sperm and egg 12. the letters used to remember mitosis 13. cell division used for asexual reproduction by unicellular organisms 14. pairs of chromosomes separate and move to opposite poles (name phase ...

**meiosis crossword - Mitosis and Meiosis#1007182 Created by ...**

Meiosis has two cycles of cell division, conveniently called Meiosis I and Meiosis II. Meiosis I halves the number of chromosomes and is also when crossing over happens. Meiosis II halves the amount of genetic information in each chromosome of each cell. The end result is four daughter cells called haploid cells.

There are many benefits of using crosswords in a science class. I love the review and reinforcement it offers the students. Crosswords are a fantastic tool to use in test review.

**Amy Brown Science Teaching Resources | Teachers Pay Teachers**

Meiosis is a type of cell division - like mitosis, but it results in four haploid cells with one-half the number of chromosomes as the original diploid cell. Meiosis occurs in plants only during sexual reproduction in specialized cells to produce a haploid egg cell. Female egg cell in pine. Meiosis differs from mitosis in several important ways.
