Practice Problems Answers

For each of the following compounds, draw the form in which it will predominate at pH = 3, pH = 6, pH = 10, and pH = 14. Solution.

Which compound has the lower pK_a ?

Solution. For each pair of compounds below, indicate which is more acidic. Solution. Write the formula for the conjugate base of each of the following acids:

a. sulfurous acid, H_2SO_3

Chapter 14 **Chemistry**

7.1 Introduction: Recall from Chapter 1 that solutions are defined as homogeneous mixtures that are mixed so thoroughly that neither component can be observed independently of the other. Solutions are all around us. Air, for example, is a solution. If you live near a lake, a river, or an ocean, that body of water is not pure H_2O but

Equation Problems of
Age. Equations are a
convenient way to
represent conditions or
relations between two
or more quantities. An
equation could have
one, two or more
unknowns. The basic

Download Ebook Chemistry

Chapter 14

rule is that if the number of unknowns is equal to the number of conditions, then these equations are solvable, otherwise not. We will see some important examples here but first, let us see the following tricks.
