~~Learn Programming—Core Programming Concepts Tutorial~~
Computer Programming - Basics - We assume you are well aware of
English Language, ... A major part of the tutorial has been
explained by taking C as programming language and then we
have shown how similar concepts work in Java and Python. So
after completion of this tutorial, you will be quite familiar with
these popular programming languages.

~~Functional programming—Wikipedia~~
Dynamic Programming. You probably won't see any dynamic
programming problems in your interview, but it's worth being
able to recognize a problem as being a candidate for dynamic
programming. This subject can be pretty difficult, as each DP
soluble problem must be defined as a recursion relation, and
coming up with it can be tricky.

~~Computer Programming Basics Tutorialspoint~~

Computer programming concepts. The concepts discussed on this page are essential knowledge to anyone who wants to become skilled in computer programming. While some are not universal, these concepts are present in the majority of computer programming languages and/or are a fundamental part of the programming process. Algorithm

~~Computer Programming Computing Concepts~~

If you follow through all of my tutorials and download my podcast that would be a good start to understanding the core concepts of programming in Java. Make sure you download an IDE and install it to create your programs (that info is in part 5 of this series entitled "tools").

~~Computer Concepts And Programming In~~

This topic explains all concepts related to computer in detail, from origin to end. The idea of computer literacy is also discussed, which includes the definition and functions of a computer. You learn about the components of a computer, the concept of hardware and software, representation of data/information, the concept of data processing and applications of IECT.

~~Buy Computer Concepts and Programming in C (UPTU) Book ...~~

In computer science, functional programming is a programming paradigm where programs are constructed by applying and composing functions. It is a declarative programming paradigm in which function definitions are trees of expressions that each return a value, rather than a sequence of imperative statements which change the state of the program.. In functional programming, functions are treated ...
