This formative Exit Ticket helps you to determine if students are able to recognize congruent triangles in overlapping triangle diagrams. This would be a good Exit Ticket to print and collect so that you can see if students are using visualize strategies (i.e. colors and shading) to identify triangles that are congruent.

Geometry 4.7 Overlapping Triangles Proofs

Answers and explanations. If two sides of a triangle are congruent, the angles opposite those sides are also congruent. If two sides and the included angle of one triangle are congruent to two sides and the included angle of another triangle, then the triangles are congruent by SAS (side-angle-side).
