Generally, a convective heat transfer problem involves: - a length scale L; - a velocity scale U; - a temperature scale based on a characteristic temperature difference between fluid and solid 4 Some dimensionless numbers are relevant to flow dynamics.

Summary. The text includes the physical mechanisms of convective heat transfer phenomena, exact or approximate solution methods, and solutions under various conditions, as well as the derivation of the basic equations of convective heat transfer and their solutions. A complete solutions manual and figure slides are also available for adopting professors.
