This paper presents a study on the effect of carbon black (CB) and short carbon fibers (SCFs) on shape memory polymer (SMP) actuation by applying electric current. The coexistence of CB and SCF electrically conductive networks, supporting each other, resulting in significant improvement of electrical properties, was supported by optical microscopy, while the roles of particulate and fibrous ...

Correction - PNAS

Les relations finance et industrie sont complexes, et l'approche historique retenue ici relativise l'idée d'un mode de financement optimal dans l'économie. Celui-ci est souvent question de circonstances et varie en fonction des institutions, de la gouvernance, ainsi que des besoins relatifs des secteurs privés et publics.

Johann Sebastian Bach - Cantata No.104: Du Hirte Israel ...

The slip effect on the particle drag coefficient is analyzed using slip boundary condition with a slip velocity around the particle surface. Barber and Emerson (2002) gave the slip velocity as: $(4) U_{slip} = -2 \cdot \sigma \cdot Kn \cdot d \cdot p \cdot 2 \cdot \mu \cdot \tau \cdot w$ where σ is the tangential momentum accommodation coefficient (TMAC) related to gas and wall and it is introduced to account for surface-gas interactions at the wall.

How to calculate the correction factors

As n grows, the factorial $n!$ increases faster than all polynomials and exponential functions (but slower than and double exponential functions) in n . Most approximations for $n!$ are based on approximating its natural logarithm $\ln n! = \sum_{k=1}^n \ln k$. The graph of the function $f(n) = \ln n!$ is shown in the figure on the right. It looks approximately linear for all reasonable values of n , but this ...

Factorial - Wikipedia

Notes on Transcribing this page (optional) Looks like typist started with month, then used correction tape to remove it. For the first word "le" it looks like they started writing "Novembre" then wrote "le" over it.
