The Similarities: In Canada, CSA Standards W47.1 and W59 define the requirements for the certification of companies involved in welding steel, including qualification requirements for welders, welding procedures and welding supervisory personnel. Weld quality, electrode/base metal matching, pre-qualified joints

tenth edition of CSA W59, Welded steel construction. It supersedes the previous editions published in 2013, 2003, 1989, 1984, 1982, 1977, 1970, 1946, and 1940. The following is a brief description of some of the most significant changes to the current edition of CSA W59:

## *CSA W59 - 2018 - Welded Steel Construction (Metal Arc ...*

CSA W59 is the code that governs welded steel construction in Canada. In Alberta, this code means that the majority of equipment built that isn't piping related is covered by this code. W59 has a convenient section of "pre-qualified" welds that make the job of specifying weld procedures much easier since most the work is actually complete.

## *CSA W59 : Welded steel construction*

CSA Standard W59-13. Other groups may be welded providing Welding Procedure Datasheets (WPDS) are accepted by CWB.

Base metal to be welded shall be as per CWB approved Welding Procedure Datasheet. 3.2 Base metal thickness from 3mm (1/8") to UNLIMITED THICKNESS may be welded under this specification

## *CSA W59 Welded Steel Construction - Power Engineering Books*

The minimum size of a fillet weld as measured should comply with Table 4.4 of CSA W59-13, unless a larger size is required to provide the calculated weld resistance. The long-standing code provision for minimum fillet size aims to reduce the cooling rate. The presence of hydrogen and fast cooling are major contributing factors for cold cracking.
