Specification for Fusion Welding for Aerospace Applications  
ANSI/AWS D17.1/D 17.1M-2010, This specification provides the general welding requirements for welding aircraft and space hardware. It includes but is not limited to the fusion welding of aluminum-based, nickel-based, iron-based, cobalt-based, magnesium-based, and titanium-based alloys using electric arc and high energy beam processes. There are requirements for welding design, personnel and ...

The AWS D17.1/D17.1M is arranged in the usual fashion, with the scope, referenced documents and definition sections at the beginning. The standard then covers design, procedure and performance qualification, and fabrication. Section 7 is on inspection, while Section 8 covers the repair of existing structures.

AWS D17.1, Specification for Fusion Welding of Aerospace ...

Also the PQR sample form in AWS D17.1/D17.1M:2010 is vastly different that the PQR sample for in AWS B2.1/B2.1M:2009. Any advice on witch to use? Thank you, James By TimGary Date 05-14-2012 20:15 Hi James, Yes, you do have to certify the equipment. The requirements are detailed in the code book.

Des anyone have practical experience with the AWS D17.1/D17.1M:2010? This one strikes me as very particular, however that's perhaps because I lack experience with this standard. Some questions: (1) What is the range of qualification for procedure qualifications (PQR's) ? I'm talking about all variables, as there are none indicated in the standard.

Response: AWS D17.1/D17.1M:2010 requires certified personnel to perform visual weld inspections. There are two approaches available. One approach uses AWS QC1 certification. The other approach employs an Engineering Authority-approved certification program based upon three criteria: experience, training and testing.
