For my water valve light switch I used a Mueller Industries, Proline 1/2" shut off valve (105-003NL) and a Carling Technologies R-135-BL rotary switch. I found the switch at Grainger.com and picked it up at a local facility near me for \$6.25. I later saw that Lowes has a very similar switch that appears to be the same size for just over \$3.

When the switch is pressed again it disconnects the +5V supply to MOSFET and the solenoid goes back to off state. The turning on and off the solenoid can be noticed by the clicking sound made by it, but to make it a bit more interesting I have connected the solenoid valve to a water pipe.
