Dog Age Calculator | Dog Years To Human Years | PEDIGREE

Our beloved dog Echo died last week. She was almost 15 years-old, or about 87 in human years. In addition to grief and fond remembrance, her death prompts thoughts about the many historical ...

Dog Years - CounterPunch.org

Size and breed also play a role. Smaller dogs tend to live longer than larger ones, but they may mature more quickly in the first few years of life. A huge pup might age more slowly at first, but be nearing middle age at 5. Tiny and toy breeds don't become "seniors" until around age 10. Medium-sized pooches are somewhere in the middle on both counts.

Dog Age Chart: How to Convert Your Dog's Age into Human Years

The terms dog years and human years are frequently used when describing the age of a dog. However, there are two diametrically opposed ways in which the terms are defined: One common nomenclature uses "human years" to represent a strict calendar basis (365 days) and a "dog year" to be the equivalent portion of a dog's lifetime, as a calendar year would be for a human being.

Aging in dogs - Wikipedia

If your dog was a human, how old would (s)he be? Do you wonder how old your dog is in human years? This website will tell you how old your dog would be if he/she was a human.

Convert Dog Years to Human Years - Calculator

Historically, it's very likely that the "one dog year equals seven human years" method was created to simply show that dogs age faster than humans. Today, scientists and researchers have developed a more precise method of calculating a dog's age to human years. Let's dig in...

Dog Age Chart: How Old Is Your Dog In Human Years? - Pumpkin®

Welcome to my virtual studio. For twenty five years photographing dogs has been my passion. Something about these creatures brings out the best in my creative spirit, their different personalities continue to inspire and amuse me. I love sharing imagery that comes from the work I do with fantastic clients across the U.S.

Amanda Jones

In many ways, the story of dog evolution follows the same plotline as the evolution of horses and elephants: a small, inoffensive, ancestral species gives rise, over the course of tens of millions of years, to the respectably sized descendants we know and love today. But there are two big differences in this case: first, dogs are carnivores, and the evolution of carnivores is a twisty ...
