Donald Davidson: A Short Introduction

Post-Keynesian economics is a school of thought about economic theory with its origins in The General Theory of John Maynard Keynes, which was published in 1936. This theory was developed by Michał Kalecki, Joan Robinson, Nicholas Kaldor, Sidney Weintraub, Paul Davidson, Piero Sraffa and Jan Kregel.

Immanuel Kant - Wikipedia

Consciousness, at its simplest, is sentience or awareness of internal and external existence. Despite centuries of analysis, definitions, explorations and debates by philosophers and scientists, consciousness remains puzzling and controversial, being "at once the most familiar and most mysterious aspect of our lives". Perhaps the only widely agreed notion about the topic is that...
