Postgraduate taught ...

What is money? Money is any good that is widely used and accepted in transactions involving the transfer of goods and services from one person to another. Economists differentiate among three different types of money: commodity money, fiat money, and bank money. Commodity money is a good whose value serves

as the value of money.

Money: The Economic
Definition. BACK; NEXT
; We all know what money
is. We may have different

terms for it—smackers, c-notes, dead presidents, Benjamins, bucks, bones, clams, dough, moolah—but money usually finds a way to overcome these barriers of dialect and speak to us all.

Economics of Money and Banking | Coursera

Specifically, the first lecture uses the conceptual apparatus of the money view to make sense of shadow banking as the quintessential form of banking for the modern financially globalized world. And the second lecture shows how the conceptual apparatus of the money view fits with

standard economics view and finance view, by drawing attention to dimensions of the world from which the standard ...

Offered by Columbia
University. The last three
or four decades have seen

a remarkable evolution in the institutions that comprise the modern monetary system. The financial crisis of 2007-2009 is a wakeup call that we need a similar evolution in the analytical apparatus and theories that we use to understand that system. Produced and sponsored by the Institute for New Economic Thinking, this ...
