DIN EN 13480-3/A2 - Metallic industrial piping - Part 3 ...
For each piping spool, the test pressure shall be limited to such a level that it does not generate a design stress greater than that given in EN 13480-3 for the test conditions by reducing, if necessary, the test pressure. For further details, see EN 13480-3.

BS EN 13480 - Metallic industrial piping
Vorwort Dieses Dokument (EN 13480-3:2012) wurde vom Technischen Komitee CEN/TC 267 „Industrielle Rohrleitungen und Fernrohrleitungen“ erarbeitet, dessen Sekretariat vom AFNOR gehalten wird.

BS EN 13480-3:2017
Within industry, piping is a system of pipes used to convey fluids (liquids and gases) from one location to another.The engineering discipline of piping design studies the efficient transport of fluid... Industrial process piping (and accompanying in-line components) can be manufactured from wood, fiberglass, glass, steel, aluminum, plastic, copper, and concrete.

Part 3: Design and calculation - gost-snip.su
le for the elaboration of the EN 13480 - part 1 to 8. AFNOR also runs the offices of WG3, responsible for EN 13480-3, and WG8, the maintenance group. The final draft version of the EN 13480-3 was adopted by the working group responsible, CEN/TC 267/WGC (now renamed WG3) in October 2001. Four to five German experts were permanently active in WGC.

Metallic industrial piping – Designs and calculation
Disclaimer: The pressures suggested in this calculator are given only as guidance. Dimensioning of piping systems is also depending on other factors like external forces, thermal stresses, dead weight etc. Furthermore the design must be made according to regulations from local authorities and approved accordingly.
