Logbooks are primarily used in the engineering profession as a way to document an individual's progress with a particular project. Activities such as precursory analysis, initial sketches, task lists, programmatic issues, reflections of past work, meeting agendas and meeting minutes are typical items recorded in a logbook.

An engineer's logbook can be used as a legal document to, for example, establish who owns an idea or innovation in the case of a patent dispute. For this reason, your logbook must be written in ink, and have each page signed (or initialed) and dated. Graphs may be done in pencil. Computer code should be permanently pasted or stapled into the book.
