Measurement & Metrology Instrumentation and control engineering (ICE) is a branch of engineering that studies the measurement and control of process variables, and the design and implementation of systems that incorporate them.

Get Free Engineering Metrology And Instrumentation

Process variables include pressure, temperature, humidity, flow, pH, force and speed. ICE combines two branches of engineering.

Metrology and instrumentation
Metrology may be divided depending upon the quantity under consideration into: metrology of

Get Free Engineering Metrology And

length, metrology of time etc. Depending upon the field of application it is divided into industrial metrology, medical metrology etc.

Engineering metrology is restricted to the measurement of length, angles and other
