Our objective, however, is not to impress nontechnical students with the rigors and complexities of pollution control technology but rather to make some of the language and ideas of environmental engineering and science more understandable.

Environmental Engineering Includes Air Pollution Control ...

Emphasizes topics related to air & water pollution as well as those related to solid waste management. Discusses the origins of pollutants, their effect on man & on the environment, & what methods are available to control them. Stresses the fundamental aspects of these topics & their application, to the design of pollution control equipment including illustrative examples.

Environmental Pollution Control/Environmental Engineering

Air pollution engineering consists of two major components: (1) air pollution control and (2) air quality engineering. Air pollution control focuses on the fundamentals of air pollutant formation in process technologies and the identification of options for mitigating or preventing air pollutant emissions.
