The Explorer was a great machine but time and technology passed it by. It would still be a great machine today just real slow in comparison to a Lazer. If you've got the bagging model be sure to adjust the belts per the operator s manual. If the manuals have been lost e-mail me with the serial number

I have an older exmark explorer, zero turn mower, model EXS20KC, S/N 93217.

The belt came off of the deck (52 inch deck) and there is no manual or diagram on the deck to show how it is threaded back on.
