IB Physics Notes - 2.1 Kinematics

Kinematics. Kinematics is the study of motion. In kinematics, you will learn about both one-dimensional and two-dimensional motion as they relate to displacement, velocity, and acceleration. You will also be acquainted with the Big 5, a set of five equations that are extremely important in physics.

Looking over the answers to the chapter questions on kinematics, I feel strongly that two of the answers are wrong and give an incomplete view of the concepts. While I understand that this chapter focuses on motion in 1-dimension, chapter question 4 asks "Can an object have a varying velocity when its speed is constant? Explain."

Kinematics : 1. Rest and Motion : * An object is said to be in motion wrt a frame of reference S 1, when its location is changing with time in same frame of reference S 1. Fig: An object at rest. * Rest and motion are relative terms. * Absolute rest and absolute motion have no meaning. Motion is broadly classified into 3 categories : 1. Rectilinear and translatory motion.
