[Student Solutions Manual for Options, Futures, and Other](#) ...
The basic difference between swaps and futures or options is that a swap involves a series of payments in the future, whereas options or futures have only one transaction at exercise/expiry. And also, swaps are usually OTC (Over-the-counter) Futures Futures are an obligation. You agree that after time T, you will pay \$K to buy X.

Derivatives. Derivatives are securities whose value is determined by an underlying asset on which it is based. Therefore the underlying asset determines the price and if the price of the asset changes, the derivative changes along with it. A few examples of derivatives are futures, forwards, options and swaps.
