Honda's Auto Choke System is available for use on GCV160 and GCV190 engines in fixed-throttle lawnmower applications. This user-friendly system is truly automatic, eliminating levers and cables. The engine starts easily whether cold or hot and is ready to use immediately.

Honda Engines | Small Engine Model Information

Honda successfully uses the SOHC design in its late V6 engines where four valves per cylinder are operated by a single camshaft. The downside of an OHC engine is that it requires a timing belt or chain with a tensioner and other related components. A timing belt must also be replaced at regular intervals.
