## **Learning Strategies And Cultural Evolution**

Human cultural traits—behaviors, ideas, and technologies that can be learned from other individuals—can exhibit complex patterns of transmission and evolution, and researchers have developed theoretical models, both verbal and mathematical, to facilitate our understanding of these patterns. Many of the first quantitative models of cultural evolution were modified from existing concepts in ...

3. Cultural identity is like a tapestry. Each of us pulls threads from multiple cultural contexts (school, church, neighborhood, country) to weave our cultural identities. People within one culture are not all the same; they each have a unique sense of cultural identity. 4. Learning about culture is a two-pronged effort.

## **Culture: A View of the Self | Learning for Justice**

Learning involves language: the language we use influences learning. On the empirical level, researchers have noted that people talk to themselves as they learn. On a more general level, there is a collection of arguments, presented most forcefully by Vigotsky, that language and learning are inextricably intertwined.

2. Evolution, learning and culture. The core quality of culture, in any species, is that something is shared by way of a specific process of learning. Thus, if culture is to be causally linked to the processes of evolution, then the first step Lorenz would have demanded is understanding the relationship between learning and evolution.
