were randomized to remain on the middle and high doses of lisinopril. The dose-dependent antihypertensive effect of lisinopril was consistent across several demographic subgroups: age, Tanner stage, gender, and race. In this study, lisinopril was generally well tolerated.

~~Lisinopril: ACE Inhibitor for Dogs and Cats - VetRxDirect~~

Lisinopril is an ACE inhibitor, which means that it increases the diameter of your dog's blood vessels, allowing blood to flow through more easily. This reduces the amount of work your heart must do to push the fluid through, prolonging your dog's heart indefinitely.

~~Lisinopril | Pet Medications~~

Fortunately lisinopril should not cause too much problem for your dog. The ASPCA Animal Poison Control Center has published that dosages below 20 mg/kg of body weight cause mild signs only, most commonly vomiting and lethargy. Higher dosages warrant decontamination with activated charcoal and intravenous fluids at a veterinary facility.

~~Puppy Raiser Manual - Guide Dog~~

Lisinopril is used to treat high blood pressure (hypertension) in adults and children who are at least 6 years old. Lisinopril is also used to treat congestive heart failure in adults, or to improve survival after a heart attack. Important information. Do not use lisinopril if you are pregnant. It could harm the unborn baby.
