What is the correct ignition timing for a mercruiser 3.0 ...

A short distance away (~1/2 inch) will be two or three more notches. These are the "Before Top Dead Center Marks" (BTDC). As the engine rotates, the BTDC marks will pass by before the TDC mark will. If you are adjusting valves you manually rotate the engine to the TDC mark. For ignition timing, you use one of the BTDC marks.

Mercruiser Ignition System | Wholesale Marine

This question concerns my timing. I have a recently rebuilt Mercruiser 4 cylinder in line 224 cu. in.(3.7L) 190. with a new timing chain. I've been trying two different methods to set the timing but something doesn't seem to add up.

Mercruiser 470 Engine Ignition Timing

Timing for Mercruiser 470 is 8 BTDC at idle speed. Mercruiser Service Bulletin specifies 4 degrees BTDC, due to new gasoline formulation.

Mercruiser 470 pertronix wiring question ... - Marine Engine

I purchased the Pertronix 40511 Flame-Thrower 40,000 volt 3.0 in conjunction with the Pertronix 1146A Ignitor to convert my 1983 Mercruiser 3.7 470 to electronic ignition. This is the second time I have purchased this pair. The first time I got everything installed, the boat ran great for about fifteen minutes then started to miss horribly.

I have a 1981 Mercruiser 470 with 760 hours which I have owned for the past three years. It was not abused (but not maintained) when I got it, but over the past 3 seasons I have upgraded most of the recommended systems including, alternator, starter, riser, thermostat, cooling systems flushed and pertronix 1146a with 40k 3 ohm coil. The engine runs fine except after 45 minutes of run time the ...

This will impact the engine starting cylinder. If the engine still will not start, the stator is bad and requires replacement. When it is time to troubleshoot or tune-up your Mercruiser ignition system, know that Wholesale Marine has everything you need. We offer a competitive pricing guarantee and most items flat rate ship the same day.

Mercruiser Engine Timing Procedures | PerfProTech.com

The 470 featured a cast aluminum engine block designed by Mercury Marine, the name Kiekhaefer's company had taken in 1969, and the block was mated with an iron cylinder head from the Ford 460 V-8 engine. The same engine block was used in several other MerCruiser engines, including the 170, 190, 485 and 488.
