Ratio and Proportion- Study Guide 12 2016 Page 1 Ratio and Proportion Study Guide 12 Ratio: A ratio is a comparison of the relationship between two quantities or categories of things. For example, a ratio might be used to compare the number of girls to the number of boys who are

HESI ENTRANCE EXAMINATION - Fort Bend Tutoring

The easiest way to solve the problem is to realize that if the ratio of boys to girls is 8:7, then the ratio of girls to all students in the school is 7:15 ($8 + 7 = 15$). To find the number of girls at this school, write this ratio as a fraction and multiply it by the total number of students in the school.

Ratio Study Guide

A ratio is a comparison of two or more numbers. A proportion is an equation of ratios. We solved basic proportions to calculate the correct mixtures of ingredients needed to make 4 or 16 pancakes. The proportions we solved were based on the ingredient/results ratio of 2:1.5:8 (read: 2 to 1.5 to 8). Let's look at another ratio.
