Biotechnology Engineering Department

Biodiesel is produced through a chemical reaction called as transesterification. The oil is first extracted through a mechanical expeller. The oil is then treated with methanol at 60 0 C in the presence of sodium hydroxide. Then produced biodiesel is separated and purified for engine use.

About Us — Reaction Engineering International

Reaction Engineering clearly and concisely covers the concepts and models of reaction engineering and then applies them to real-world reactor design. The book emphasizes that the foundation of reaction engineering requires the use of kinetics and transport knowledge to explain and analyze reactor behaviors.

About the Institute - Welcome to NMAM Institute of Technology Department of Chemical Engineering 77 Massachusetts Avenue, Room 66-350 Cambridge, Massachusetts 02139
