SOIL TESTING PROCEDURES FOR SOIL SURVEY

Mission. The Virginia Tech Soil Testing Laboratory is affiliated with both Virginia Cooperative Extension and the School of Plant and Environmental Sciences, and analyzes soil samples submitted by the public and university researchers. Tests are performed to evaluate the soil's nutrient potential and to determine the most beneficial application rates of fertilizer and lime for optimum plant growth.

Soil classification testing shall be performed in accordance with AASHTO T 88 and T 89. The reported soil description shall include percents: gravel, sand, silt and clay and the AASHTO soils classification. Organic content testing (loss on ignition) shall be performed in accordance with ASTHO T 267.

manual can be used as a textbook in civil engineering undergraduate program as well as a reference in the geotechnical engineering practice. Each laboratory testing includes a brief introduction of the the-

SOIL TESTING LABORATORY MANUAL | pdf Book Manual Free download
Carefully, with a constant, even pressure, push the ring into the laboratory sample. When the ring is approximately one half filled with soil, trim away the excess soil around the outside of the ring. Continue to push the ring into the sample until the soil is slightly above the top edge of the ring.
