500 Level Courses. IOE 506 (Math 506).
Stochastic Analysis for Finance
Prerequisite: graduate standing or
permission of advisor. (3 credits) The
aim of this course is to teach the
probabilistic techniques and concepts
from the theory of stochastic processes
required to understand the widely used
financial models.

Civil Engineering. Civil engineering
occupies a prominent position as one of
the major fields in the engineering
profession. Civil engineers are
concerned with all aspects of the
conception, planning, design,
construction, operation, and
maintenance of major physical works
and facilities that are essential to
modern life.

Contrib/waves2Foam. The library waves2Foam is a toolbox used to generate and absorb free surface water waves. Currently the method applies the relaxation zone technique (active sponge layers) and a large range of wave theories are supported and the relaxation zones can take arbitrary shapes.

Optimal control theory is a branch of applied mathematics that deals with finding a control law for a dynamical system over a period of time such that an objective function is optimized. It has numerous applications in both science and engineering. For example, the dynamical system might be a spacecraft with controls corresponding to rocket
