Access PDF Spreadsheet Based Decision Systems ... Support Systems

A decision support system (DSS) is a system that enhances the decision making process. A DSS typically offers the decision maker one or more computer-based tools that may be used to structure a decision making situation and enhance the quality of decision making (Marakas, 2003).

Based Decision Support Systems ...

If a decision support system (DSS) has been or will be implemented using a spreadsheet package it can be termed a spreadsheet-based DSS. A spreadsheet package is the enabling technology for the DSS. Both model-driven and small-scale, data-driven DSS can be implemented using

Decision Support Systems ..

This paper describes an MS Excel-based decision support system for wood panel manufacturing. The system is easy to use and maintain yet gives shop floor personnel access to powerful optimization capabilities useful for fine-tuning production processes in the face of changing supply and price situations.
