Student Exploration Subtractive Colors Answer Key | pdf ...

The Subtractive Colors Gizmo allows you to explore how light is absorbed and reflected by colored pigments such as paint. Three primary colors of light—red, green, and blue—combine to make white light. Turn on Show RGB values at the mouse location to see how much red, green, and blue is in each color. 1. Move the cursor over a white area.

Student Exploration- H-R Diagram (ANSWER KEY).docx ...

The Additive Colors Gizmo demonstrates how any color can be produced by varying the intensities of three primary colors of light: red, green, and blue (RGB). Additive colors are produced directly by a light source such as a TV or a computer screen. The Subtractive Colors Gizmo demonstrates how colors are produced by mixing pigments such as paint. As more pigments are added, more light is absorbed and the resulting color becomes darker.
