Even 600 years ago the effect of technology on Christianity was a topic for discussion and debate! Blaise Pascal, Isaac Newton, and Samuel Morse were scientists who held Christianity and the Bible in the highest regard. What motivated them was a confidence in the "rationality" behind the universe and the "goodness" of the material world ...

The Effect of Technology on Christianity - DBU

The thermoelectric effect is the direct conversion of temperature differences to electric voltage and vice versa via a thermocouple. A thermoelectric device creates a voltage when there is a different temperature on each side. Conversely, when a voltage is applied to it, heat is transferred from one side to the other, creating a temperature difference. At the atomic scale, an applied ...

Thermoelectric effect - Wikipedia

The Doppler effect, or Doppler shift, describes the changes in frequency of any kind of sound or light wave produced by a moving source with respect to an observer. Waves emitted by an object traveling toward an observer get compressed — prompting a higher frequency — as the source approaches the observer.

Explained: the Doppler effect | MIT News | Massachusetts ...

The piezoelectric effect also has its use in more mundane applications as well, such as acting as the ignition source for cigarette lighters. The History of the Piezoelectric Effect. The direct piezoelectric effect was first seen in 1880, and was initiated by the brothers Pierre and Jacques Curie.
