A Beginners' Guide to Uninterruptible Power Supplies. When buying an uninterruptible power supply (UPS) system, sometimes it can be difficult to know which system be the right one for you. Some UPS systems are more suitable for smaller applications such as home offices, whilst others can provide enough power for entire data centres.

## **STATIC UNINTERRUPTIBLE POWER SUPPLY**

As the name implies, an uninterruptible power supply is just that: uninterruptible. This means power surges, blackouts, brownouts, and any other power-related problems won't result in your UPS going offline. The UPS will only turn off if its battery is emptied, it's turned off manually, or it is physically destroyed by an outside force.
