The three types of electric motors most commonly used in wastewater pumping are (1) squirrel-cage induction, (2) wound-rotor induction, and (3) synchronous. Squirrel-cage induction motors will normally be selected for constant speed pump applications because of their simplicity, reliability and economy.

Introduction to Wastewater Collection and Pumping

E - 1214 - Wastewater Collection and Pumping This course will introduce you to the principles and practices of wastewater collection and pumping. You will learn about preliminary sewer design issues, the hydraulic design of gravity and pressure sewers, sewer system layout, appurtenances, and structural design of sewer lines.
