The following is an example of documenting the wound assessment in CIS. 1. Right Ischial Stage IV Pressure Ulcer is added to the Problem List in both the Acute and Intensive Care areas. 2. On the Acute Care Unit, modify form to add cell for the specific wound under the Assessment Tab on CIS: 3.

Wound Assessment Documentation Example

a. A wound assessment is done as part of the overall client assessment (cardiorespiratory status, nutritional status, etc) b. Wound assessments are to be done and documented on the WATFS by an NP/RN/RPN/LPN/ESN/SN. The individual who does the wound assessment must be the person who documents the parameters. c.

Documenting Surgical Incision Site Care : Nursing2020

“The comprehensive wound assessment follows the patient assessment. The wound assessment will define the status of the wound and begin to identify impediments to the healing process”.(1) Hess, C.T. and Kirsner, R.S., 2003 The authors and Coloplast A/S hope that this pocket guide will help you in clinical practice. Barriers consisting

WOUND BASICS ASSESSMENT MANAGEMENT

+ Document the location and extent, referring to the location as time on a clock (e.g., wound tunnels 1.9 cm at 3:00). Tunneling – A narrow passageway that may extend in any direction within the wound bed.

Wound Series Part 1: Assessing and Diagnosing Chronic ...

Although not diagnostic, examination of the edge of the wound may help to identify its aetiology in the context of the history of the wound. For example, venous leg ulcers generally have gently sloping edges, arterial ulcers often appear well demarcated and “punched out,” and rolled or everted edges should raise the suspicion of malignancy.

Reference for Wound Documentation

Wound Documentation Tip #1: Visual Inspection. Do describe what you see: type of wound, location, size, stage or depth, color, tissue type, exudate, erythema, condition of periwound. Don't guess at the type or the stage of a pressure ulcer/injury (hereafter, pressure injury) or the depth of the wound.

Dos and Don'ts for Documentation of Wounds | WoundSource

Definition: Pressure Ulcer • Localized area of tissue necrosis due to compression of soft tissue, usually between a bony prominence & external surface for a prolonged amount of time (National Pressure Ulcer Advisory Panel, 1989). • Risk Assessment using Braden Scale • Remember “SKIN” 1. Surface selection 2.
